

Press Release

**Dynasign Corporation and CSI, Incorporated Announce National Launch of
Digital Signage Services Suite (DSSS)**

June 16, 2008. Dynasign Corporation (Fremont, CA) a leader in the Digital Signage space, and CSI, Incorporated, a prominent national field services and installation company (San Leandro, CA) today jointly announced the immediate availability of Digital Signage Services Suite (DSSS), a portfolio of professional and field services developed exclusively for Digital Signage Service Providers and Operators across the U.S.

“Service Providers today are faced with significant challenges before, during and after a Digital Signage services launch”, said John D. Fraticelli, CEO of CSI, Incorporated. “These challenges range from managing multiple vendors, negotiating service agreements, supply chain and logistical issues, to the timely scheduling of electrical, installation, and repair services. It can be overwhelming.”

“In addition to a digital signage technology platform, the Digital Signage Services Suite (DSSS) allows our customers to select from a portfolio of specialized services that serve to facilitate digital signage network deployments and on-going network maintenance”, added Alex P. Wang, President of Dynasign Corporation.

The Digital Signage Services Suite is comprised of the following services: Product Sourcing, Project Management, Network Design, Inbound/Outbound Call Center & Dispatch Services, Site Surveys, Pre-Staging/Fulfillment, Kitting, Remote Warehousing, Electrical, Installation Services, Break/Fix Maintenance and RMA services. Product financing and content development services are also available.

About CSI, Incorporated

CSI was founded in 1996 on the principals of providing the communications industry and the communities we serve with a better installation and customer service experience. CSI currently provides its field services to the leading national xDSL, Broadband Cable and Digital Signage Service Providers. A national work force, complimented by a national warehouse network, enables CSI to deliver field services to any zip code in the U.S. today.
